

# Porapipat Kaenput

Computer Science

## Web Developer.

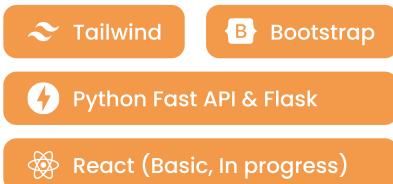

Hello. My name is **Porapipat Kaenput**. I am taking a 9-credit module course for **Full-Stack Web Development** because I am deeply interested in this field and eager to expand my knowledge and skills. Throughout the course, I am acquiring proficiency in various programming languages, including **HTML, CSS, PHP, Others**, as well as **Web Architecture and Security concepts**. I am also working on a website project to strengthen my practical abilities further. My ultimate goal is to pursue a career in web development.

## Skills

### Programming languages

### Library and Framework

### Tools

VS code, IntelliJ IDEA, GitHub, Ubuntu (Linux command), javaFX, Docker(Basic), MySQL DigitalOcean (Ubuntu, Apache HTTP Server), Azure(Basic)

### Others

Website security(Basic), Web Application Architecture

### Soft Skills

Problem solving, Critical thinking, Responsibility, Emotional Intelligence, Organization, Communication

### Education.

- Triamudomsuksa Northeast (2017 - 2020)
- King Mongkut's Institute of Technology Ladkrabang - Computer Science (2021 - Present) **GPA: 3.41**

- 📞 0943654100

## PROJECT EXPERIENCE

Nov 27, 2020

### Remember Tiles ↗ Head Project

I developed a **Desktop mini game application** for ADHD patients which presents colored tiles to recall and select in the correct order.

Java, IntelliJ IDEA, JavaFX, Medium(Practice Blogging)

Maybe 2021

### Alumni Search Head Project

I developed a **basic web application** that allowed users to search for alumni based on their name and province.

Docker, Python, Python Flask, SQL Server, Azure

Nov 20, 2022

### Help you rich Line Chatbot ↗ Back End Dev, Database, Cloud

I built a **Line chatbot** that was able to **check lottery results**, display retrospective lottery results, provide lucky numbers based on dreams and statistics lottery.

Python, Line, Line Developer, Dialogflow, Flask Line bot sdk, SQLite, DigitalOcean, RapidAPI(Thai Lottery API), Web Scraping(BeautifulSoup)

Dec 26, 2022

### TrainJung React-Native ↗ Doc. BackEnd(API), Database, Cloud

I developed a **mobile application** that allowed users to **locate railway stations**, view station information, bookmark frequently used stations, and administrators can update train statuses in case of delays. (**My responsibility was limited to backend Only**)

React-Native(JS), Android Studio, Python, Fast API, DigitalOcean, SQLite

Feb 17, 2023

### bookstore.porapipat.me ↗ Individual Full-Stack Project

I developed **Web Application** that users can purchase books and generate reports, while providing the administrator with the ability to manage inventory and generate reports for printing.
